PROFESSIONAL SUMMARY

Data Analyst with hands-on expertise in Power BI, Excel, SQL, and DAX, gained through a structured mentorship program and part-time instructional role. Skilled at cleaning, modeling, and analyzing datasets to build interactive dashboards and communicate findings to non-technical stakeholders. Completed a self-directed healthcare analytics project using a public synthetic dataset, earning a Best Presentation Award for data storytelling. Currently seeking Data Analyst or Business Intelligence Analyst roles, including remote and international opportunities.

CORE COMPETENCIES

Analytics & BI: Power BI, DAX, Data Modeling, KPI Development, Business Intelligence Reporting

Data & Query: SQL, Microsoft Excel (Advanced), Power Query, ETL, Data Cleaning, Feature Engineering

Visualization: Interactive Dashboard Design, Data Storytelling, Data Visualization

Soft Skills: Stakeholder Communication, Analytical Thinking, Problem Solving, Training & Mentoring

Keywords (ATS): Data Analyst | Business Intelligence | Reporting | Data-Driven Decision Making | Healthcare Analytics

WORK EXPERIENCE

Data Analyst Tutor | Digital World Tech Academy

Nov 2025 – Present · Part-time

- Designed and delivered a hands-on training curriculum covering Power BI, Excel, SQL, DAX, and data storytelling for cohorts of aspiring data analysts, taking learners from foundational concepts to job-ready dashboard skills.
- Reviewed and quality-checked student dashboards built on real-world datasets, evaluating data accuracy, DAX logic, Power Query transformations, and data model integrity — raising overall project quality across each cohort.
- Coached learners in structured analytical thinking and stakeholder-ready presentation skills.
- Translated technical workflows (ETL pipelines, data modeling, DAX formulas) into clear, step-by-step instructional content, improving learner comprehension and reducing common dashboard errors.

PROJECTS

Massachusetts General Hospital — Patient Analytics Dashboard

Power BI | DAX | Excel | Power Query

Self-directed project, built during the Skills To Career (STC) Mentorship Program, using a public synthetic healthcare dataset ·

github.com/Opsy-001/massachusetts-general-hospital-analysis

- Cleaned, transformed, and modeled a synthetic dataset of 28,000+ patient encounters (2011–2022) using Excel, Power Query, and DAX, then built a 4-page interactive Power BI report covering cost drivers, demographic trends, and length-of-stay patterns.
- Identified uninsured patients as the highest financial risk group, accounting for \$49M in total treatment costs — the single largest payer category — surfacing a cost-optimization opportunity for stakeholders.
- Tracked inpatient readmission trends from 2011–2022 and flagged a reversal in outcomes after 2020 (12% in 2020 rising to 27% in 2022), highlighting an area for targeted intervention.
- Found that heart-related procedures drive the highest average treatment costs, with Myocardial Infarction averaging \$66K per encounter, providing a data-backed basis for cost-reduction recommendations.
- Presented findings and recommendations to a panel of mentors and peers, earning the Best Presentation Award (STC Cohort 3, May 2026) for clarity and effectiveness in data storytelling.

EDUCATION

B.Ed. Secretarial Administration Education — Second Class Upper | Olabisi Onabanjo University · 2024

CERTIFICATIONS & TRAINING

- STC Job-Ready Data Analytics Mentorship Program — Skills To Career (5-week program, completed May 2026)
- Data Analytics Certificate — Digital World Tech Academy (2026)
- ICT Fundamentals Certificate — Digital World Tech Academy (2025)

AWARDS & RECOGNITION

- Best Presentation Award — Skills To Career Mentorship Program, Cohort 3 (May 2026). Recognized for clarity, confidence, and effectiveness presenting a healthcare analytics project to a virtual panel.
